Improvements made from Professor Feedback

- Additional submission of API documentation
- Optimization Project

Problem Statement

With this app I want to try to make it easier for users to sort their garbage and create their own garbage type profile.

01

Project Description

Project Description

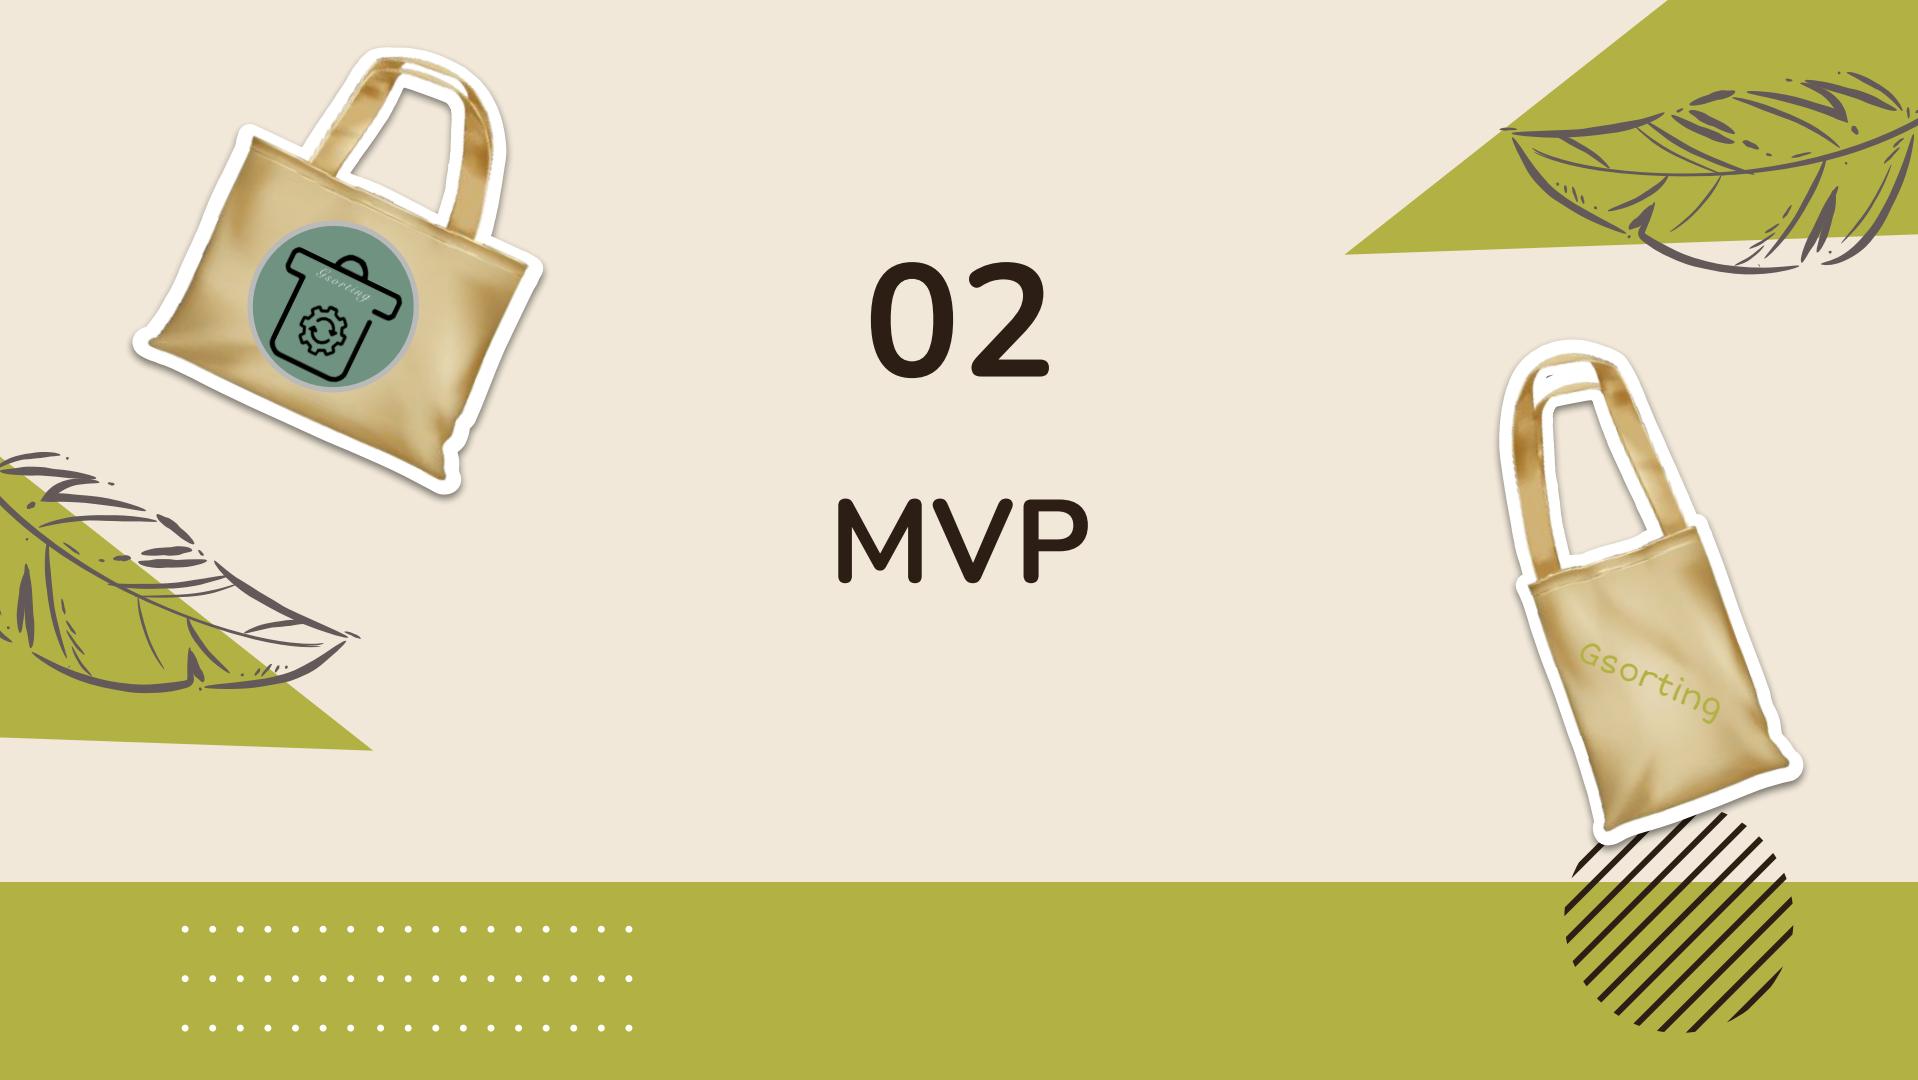

“Gsorting” is a mobile application developed by Pace University students for CS 691 and CS 692 projects.

- Primary goal- Identify waste types and give disposal recommendations
- Feature Function- text search and photo scan search.
- Better- Intuitive interface and user-friendly design, easier to use! Added trash note function to help users manage trash at home

02

MVP

Minimal Viable Product

The image shows five screenshots of a mobile application interface for waste management:

- Login Screen:** Features a green header with a recycling symbol icon. Below it is a decorative illustration of wind turbines and clouds. Input fields for "Account" and "Password" are present, along with "Login" and "register" buttons.
- Register Screen:** Features a green header with a recycling symbol icon. It includes a user profile icon and input fields for "Account", "Nickname", "Sex" (radio buttons for Man/Woman), "Mobile", "Address", "Password", and "Confirm". A "Register" button is at the bottom.
- Home Screen:** Features a green header with a recycling symbol icon. A search bar contains the text "glasses". Below it is a grid of four icons: wet garbage (red), dry refuse (black), recyclables (blue), and harmful (red). A detailed guide for "Dry refuse" is displayed, mentioning household waste, fragility, and contamination.
- wet garbage Screen:** Features a green header with a recycling symbol icon. It lists items like "Dumplings(wet garbage)", "egg shell(wet garbage)", "langoustine(wet garbage)", "biscuits(wet garbage)", "watermelon rind(wet garbage)", and "shrimp shell(wet garbage)". Each item has a "Wet garbage delivery guide" link and a blue edit icon.
- My Screen:** Features a green header with a recycling symbol icon. It shows a user profile picture of Pikachu and the username "cz". Navigation links include "Personal", "Security", "Language Setting", and "About". Buttons for "Logout" and "ExitApp" are at the bottom.

03

Technologies

04

Personas

Persona 1-Eco-Conscious Edith

Name: Edith Lucy

Age: 30

Environmentally conscious homeowner:
This person is environmentally conscious and actively seeks ways to reduce their household's carbon footprint. They may use the Gsorting app to identify and dispose of household waste in an environmentally friendly way.

Persona 2 - Busy White

Name: Mr. White & Mrs. White

Age: 33 & 28 (Mr. White & Mrs. White)

Busy Parents: This persona is a pair of busy parents with limited time to do household chores. They can use the Gsorting app to identify the type of waste and get quick disposal advice to get rid of household waste quickly.

Persona 3-Student Sam

Name: Sam Peter

Age: 20

Student tenant: He's a college freshman. He may not be familiar with the waste management regulations of the city where the university is located and he can use the Gsorting app to properly sort his household waste and avoid fines.

05

Algorithms

Deep learning model

- A garbage classification dataset is first collected, including various types of garbage images.
- The ResNet18 model was selected as the classifier. The accuracy of the garbage classification task using the ResNet18 model was tested to be relatively high, typically above 97%.

Sprint 1 Recap

ID	Name	Creation Date	Description
US1	Menu	01/24/2023	As a user, I hope to have a menu button that allows users to switch UI from one to another so that I can freely choose which category of garbage I want to know/search for.
US2	App reliability	01/24/2023	As a user, I want the app's reliability to be over 90% of successful running. This App would not be interrupted by other apps when it's working and it's compatible with different browsers.
US3	Setup Language	01/24/2023	As a user, I want the app's ability to set up the language(Chinese, English, and so on). So I can use it no matter what language I'm using.
US5	Language Switch	01/24/2023	As a user, the content of the app should not be confused by the language, I want to set a language change option so that people from a different country can use this app directly.
US8	Camera Scan	01/24/2023	As a user, I want to scan stuff so that I can search for more details on the app
US9	Picture Viewer	01/24/2023	As a user, I want images to distinguish the types of junk I'm looking for so I don't have to read a lot of text while searching for information.
US10	Word description	01/24/2023	As a user, I need as detailed text description as possible to introduce the knowledge of garbage classification to me, so that as to improve my garbage classification ability.
US12	About	01/24/2023	As a user, I want to know the information of the developer of this app, which helps me to understand this app
US13	UI	01/24/2023	As a user, I want the app to have a good UI design, so that I can use it more smoothly
US14	Upload picture	01/24/2023	As a user, I want to upload the picture I would like to use for my profile.
US15	Settings	01/24/2023	As a user, I want to be able to change settings so that I can use the app with my preferred options.
US17	Searcher	01/24/2023	As a user, I want to search for this item to find out what category it belongs to, so that I can realize how to recycle or dispose of it.
US21	Clickable picture	01/24/2023	As a user, I want to have a clickable picture so that I can select the detailed spam classification information THAT I want to know/search for.

Sprint 2, I completed user stories

Completed/Committed Ratio

“Committed/Completed Ratio”

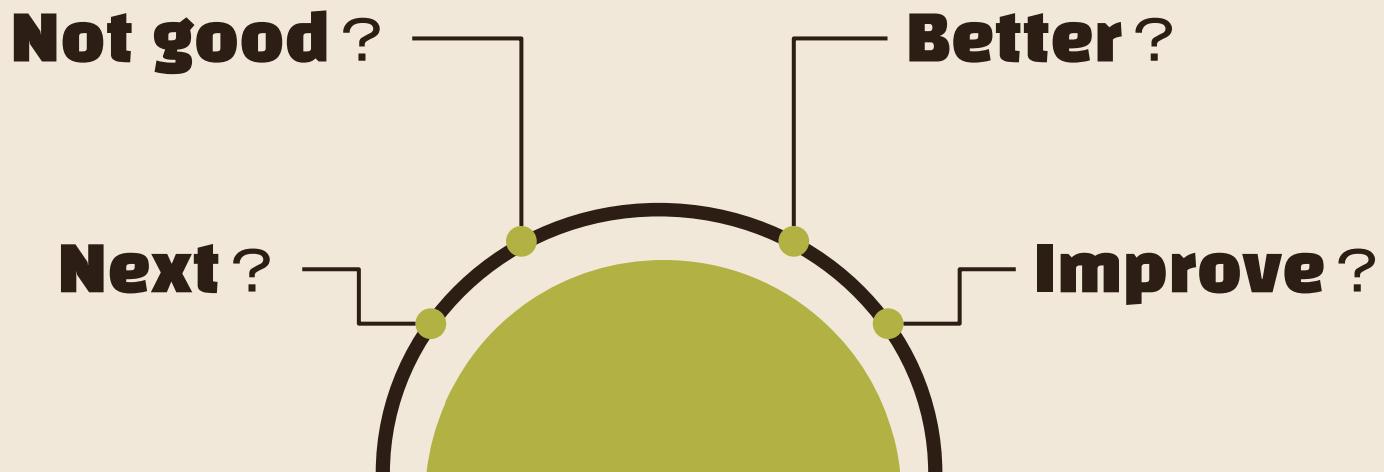

■ Completed ■ Incompleted

=**8/10**

=**80%**

11 Retrospective

Retrospective

What is going well ?

- *UI design is easy to use*
- *Completed deep learning model as back-end*

01

What to do next ?

- Access to AWS for the app

03

What needs to be improved ?

- Larger images can't be uploaded, I need to try to fix this

12

GitHub

<https://github.com/htmw/2023S-czhang>

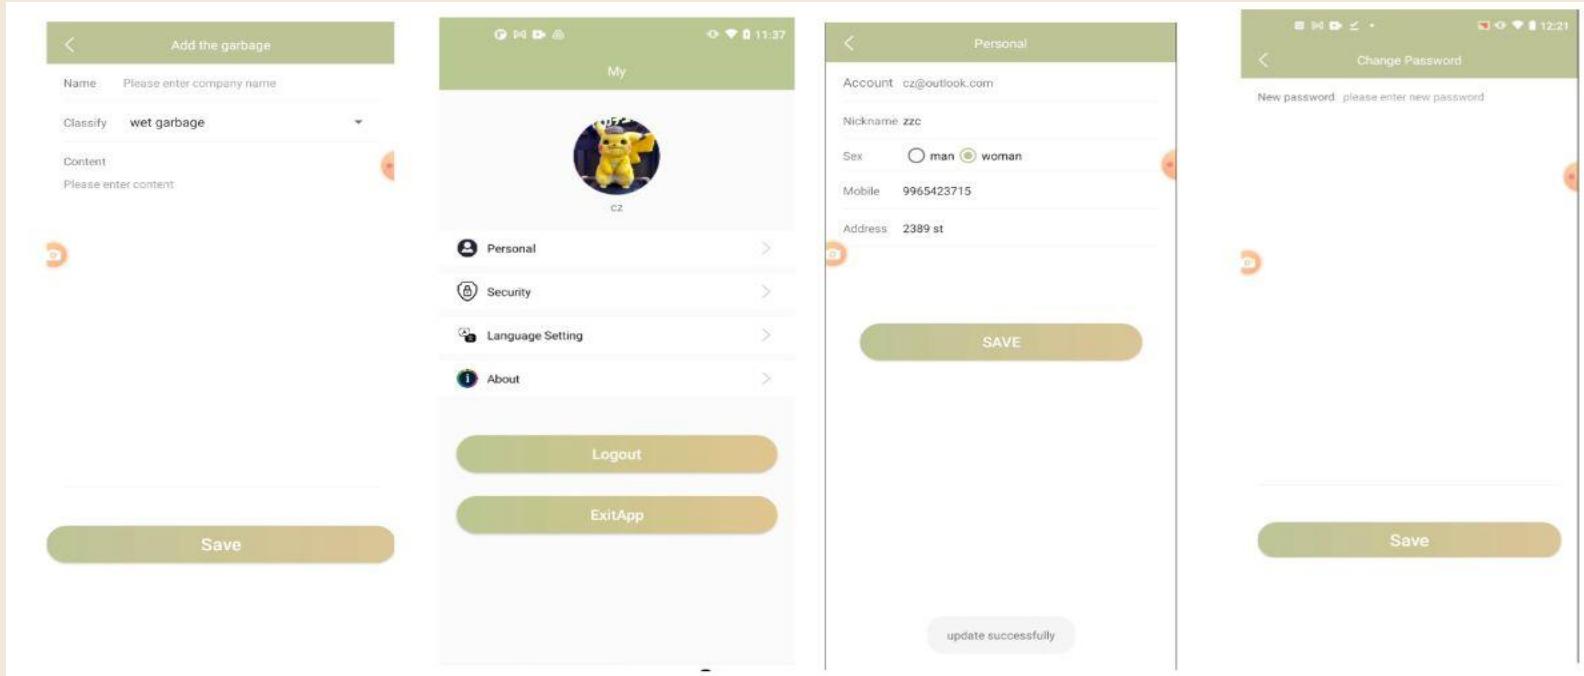

12. MVP Project Demo

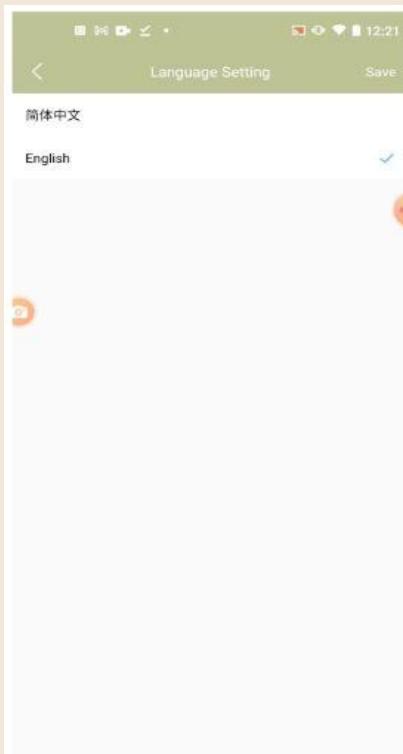

The image displays five screenshots of a mobile application interface:

- 4. GSorting**: A landing screen featuring a large circular icon with a recycling symbol and the text "GSorting". Below it are two buttons: "Login" and "register".
- 5. Login**: A login screen with a decorative background of green trees and wind turbines. It contains fields for "Account" (placeholder: Please input account) and "Password" (placeholder: Please enter your password). Below the fields are "Login" and "register" buttons.
- 6. Register**: A registration screen showing a placeholder profile picture. It includes fields for "Account" (placeholder: Please input account), "Nickname" (placeholder: Please input Nickname), "Sex" (radio buttons for Man and Woman), "Mobile" (placeholder: Please enter your mobile), "Address" (placeholder: Please enter your address), "Password" (placeholder: Please enter your password), and "Confirm" (placeholder: Please enter confirmation password). Below these fields are "Register" and "login" buttons.
- 7. Home**: A home screen showing a camera icon and a search bar. It lists four categories: "wet garbage" (with an icon of a dumpling), "dry refuse" (with an icon of a piece of paper), "recyclables" (with an icon of a blue square), and "harmful" (with an icon of a plant). Below these are sections for "Dry refuse" (with an icon of a trash bin) and "Recyclable waste" (with an icon of a recycling symbol).
- 8. wet garbage**: A detailed view of the "wet garbage" category. It lists items like "Dumplings(wet garbage)" and "egg shell(wet garbage)". Each item has a "Wet garbage delivery guide" link and a pencil icon for editing. Below this is a list of other categories: "langoustine(wet garbage)", "biscuits(wet garbage)", "watermelon rind(wet garbage)", "watermelon seeds(wet garbage)", and "shrimp shell(wet garbage)". Each category also has a "Wet garbage delivery guide" link and a pencil icon.
